

Morice Timber Supply Area Preliminary Social and Economic Indicators

Introduction

Throughout the Scenario Planning Process, a number of resource values, and indicators were identified that related to social and economic issues for the communities of interest in the Morice Timber Supply Area (TSA). Each of these values was chronicled in the Scenario Planning Database and served as the starting point for a more thorough exploration during the delivery of the “Local Social Indicator Development” Project.

This Report details the results of discussions related to social and economic values that were held during Scenario Planning sessions. This reference document provides a valuable resource for ongoing projects related to Social Indicators. For more information on the Scenario Planning process, which was used to identify and capture the detailed management objectives, strategies and indicators required for SFM, please refer to the “Scenario Planning Summary Report” available from the Morice & Lakes IFPA website.

Terms and Definitions

The following table defines the terms found in this report.

Term	Definition	Examples
Resource	Identifies the forest resource being described.	<ul style="list-style-type: none"> • Agriculture • Landscape and Stand Level Biodiversity • Recreation • Timber • Visual • Watershed and Riparian • Wildlife • Community Stability
Value/Issue	Identifies specific resource values and/or issues that directly relate to each resource.	<ul style="list-style-type: none"> • Agricultural Products. • Fair distribution of timber and non-timber benefits and costs over time. • Fair, equitable and effective public participation.
Value Rank	Scenario Planning Team ranking of IFPA value/issues for analysis purposes.	1 (High) to 3 (Low)
CSA Ref	Cross reference to CSA SFM Element.	19 Different Elements

Term	Definition	Examples
Indicator	Lists the indicators which may be used to measure the success of practices and/or assumptions towards meeting objectives.	<ul style="list-style-type: none"> • Area harvested within the Agricultural/Settlement RMZ by licensee. • % of total goods and services provided by local vendors by licensee (operational). • % seral stage distribution by non-timber tenure license by forest licensee. • Benefits directed into local communities by licensee.
Indicator Rating	Scenario Planning Team ranking of Indicators for analysis purposes.	<ul style="list-style-type: none"> • CSA – Canadian Standards Association (Forecast). • CSA-O – Canadian Standards Association (Operational). • S – Socio-economic.
